Advanced Anti-Ageing Facial Treatment

At the Virginia Williams South Woodford studio, I'm delighted to be able to offer a 90-minute anti-ageing treatment session which uses two innovative machines - Microdermabrasion and Lifting.

These two ingenious machines were top of the list of the ten most popular non-invasive treatments, in interviews carried out by top plastic surgeons and Medi-spa owners in the USA.

The microdermabrasion machine is a powerful yet gentle treatment, which delicately removes the top layers of skin, and helps to even out expression lines. During the treatment, tiny crystals are used to exfoliate the skin, then they are removed with a suction mechanism, taking dead skin cells and skin debris with them. You might experience sensitivity or slight redness after the treatment, but this will usually calm down within a few hours..

In the second part of the treatment, we apply a low level electrical micro-current to increase energy levels in the skin cells. This works to 'lift' the muscles of the face, raising eyebrows as and relaxing deep-set expression lines. It's up to you whether you would prefer the treatment to concentrate on your eyes and forehead, or lower jaw and neck.

I recommend a course of six to ten treatments to achieve the best anti-ageing results. We take before and after photographs to show you the results, so that you'll feel glamorous and youthful again – and have a visible record of the progress, week by week.

Prices

Treatment Time is 90 minutes
Cost Per Session - £75

Course of 6 treatments
£375.00 (you pay for 5)

Course of 10 treatments
£600.00 (you pay for 8)

Lightening Facial Peel

Maintaining a youthful complexion isn't impossible, but it relies on understanding the changes that take place in our skin and reacting accordingly. That's why Virginia Williams Skin Care Studio is delighted to introduce the new Lightening & Brightening Lift, to combat one of the chief anti-ageing issues – hyperpigmentation.

The Lightening & Brightening Lift has been brought in due to popular demand, as a way of evening out and brightening the complexion in three simple steps. If you want clear, vibrant skin at any age, this could be the treatment for you.

Benefits of this targeted exfoliation and skin rejuvenation include improved skin texture and tone, refreshed and well-cleansed skin, an illuminated complexion with tightened freckles and diminished age spots. It can also help rosacea. But first things first – do you need it yet?

Have I got Hyperpigmentation?

These are the tell-tale signs of problem pigmentation in your complexion that could mean you need the Lightening & Brightening Lift:

- Dark areas on your skin
- Patchy toned complexion
- Blotches from long-term sun exposure
- Liver spots, also known as age spots - irregular flat brown marks on the skin

So, what's next?

Stage 1 – Pre-treatment Home Care

Time taken: 1-2 weeks depending on the level of hyperpigmentation
This part of the process is all about helping to prepare your skin for the resurfacing treatment ahead. Morning and evening, you will apply the recommended AHA cleanser & lightening serum, taking care also to also wear a minimum 30 factor SPF..

Stage 2: The Treatment, Initial consultation & skin scanning

Depending on the level of hyperpigmentation, you can take one of two courses. Most people will start at Level I, which is the gentler treatment. The level of treatment will be determined during your professional skin consultation and scanning.

Level I – Startbright

Course of 6 treatments, taken once every fortnight
Course costs £300 (including a FREE Post Treatment kit worth £41.50) or £50 per session
Treatment time: 30 minutes per session
Effect: Superficial Peeling, 1-3 days of light exfoliation

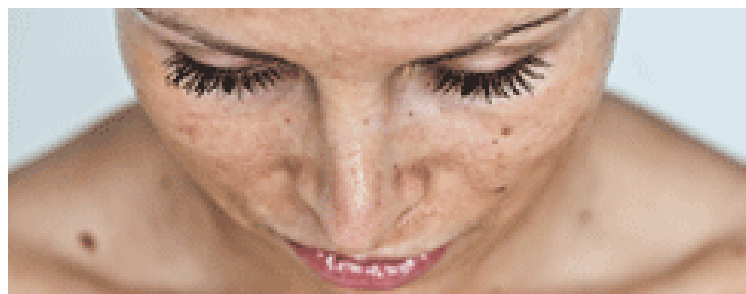

Level II – Staybright

Course of 4 treatments taken once every fortnight:
Course cost £260 (including a FREE Post Treatment kit worth £41.50) or £65.00 per session
Effect: Moderate Peeling, 2-4 days of light/medium exfoliation

Stage 3: Post-treatment Home Care for up to 2 weeks following the treatment

The post treatment kit is specifically designed for post-treatment and post-operative conditions to accelerate and enhance the healing phase. Dramatically reduces the inflammatory process of healing and soothes irritated, sensitive skin, i.e. after peelings or dermabrasions.

All peels are suitable for black and asian skin

Prices

Treatment Time is 90 minutes
Cost Per Session - £75

Course of 6 treatments
£375.00 (you pay for 5)

Course of 10 treatments
£600.00 (you pay for 8)

Just one session of the Lightening & Brightening Lift delivered far more than I expected. After some initial shedding and redness, I was rewarded with oil-free skin for days and a much clearer complexion. Old sunburn scarring on my nose was greatly diminished and skin is softer to the touch too. Would have this pigmentation peel again!

– Jayne from East London
